

eAgent™ JXI

Justice XML Interface

eAgent JXI can quickly and easily connect your Warrant, Jail, Ticketing, Court or custom system to the State's NCIC Message Switch System. eAgent JXI is a table driven, multi-platform, XML interface solution that simplifies the way you exchange law enforcement information.

Request Table

```
<message><field name="MKE">QV</field>
<field name="ORI">DCI000002</field>
<field name="LIC">DCIPLATE</field>
<field name="IND">Y</field></message>
```

Response Table

```
<message>
<field name="ORI">DCI000002</field>
<fieldname="BODY">QV.NCIC00000 10/03/07
NO RECORD LIC/DCIPLATE </field></message>
```

Table Driven

- Tightly Integrated with your SQL Database Inbound & Outbound tables for message transmission
- No need to "learn" complicated State/NCIC socket interface protocol

Multi-Platform

- Microsoft SQL Server, ORACLE, and MySQL
- Windows, Linux, or Unix

XML Interface

- Easy to create XML Formatted Messages
- Capable of most State Interface Protocols
- Facilitates the integration of non-related systems

Simple

- Easy to Install!
- Save on Development Cost
- No Additional Hardware required
- Utilizes proven DCI eAgent technology
- Support and Maintenance includes all NCIC TOU Updates
